The screenshot displays a software interface for scanning and processing a VDR-1 ID card. The main area shows a scan of a Swiss passport under UV light, with blue glowing patterns overlaid. The passport text is partially legible, including 'Zürich ZH', 'C1062085', '2014', and 'Schweiz - Suisse - Svizzera - Svizra - Switzerland'. To the right, an 'OCR-B Data - ID' section provides a structured list of fields with their corresponding values from the scan. Below the main scan area, there are four small thumbnail images labeled 'White', 'IR', 'UV', and 'SmartChip', representing different scanning modes. A green 'VALID' button is located at the bottom right of the interface.
